PORTABLE BULLET TRAP: PBT-1

The **P**ortable **B**ullet Trap (**PBT**) is designed to be used as a low-priced safety device for protection against accidental discharge of a weapon during loading or unloading of the weapon.

Features:

- Prevent penetration and ricochet of the selected weapons
- Lead absorbing
- Low cost and light weight
- Wall or table top mountable
- Integral mounting bracket and lifting handle
- Dimensions:6” W x 9” H x 10” L
- Weight: 14 lbs.

Testing:

Optional Floor Stand

The Portable Bullet Trap has been ballistic tested to the following hand gun and rifle cartridges:

- **9mm 124gr FMJ**
- **44 MAG 240gr JHP**
- **7.62mm 148gr FMJ M80 (Rifle)**

Recommended Safety Practices: Although the PBT-1 can take more multiple shots, it is recommended that it should be replaced after three (3) shots. The clearing station user should be a trained professional, with knowledge of fire arm safety, and to direct the muzzle of the weapon straight into the centre of the unit. It is also recommended with regards to the Canadian Labor Code part II, the user to wear safety goggles and ear protection.

For more information on the Portable Bullet Trap, please contact Hailom G. Gebremeskel, B.Eng., Manager.
